

The year is 2043.

Say Hello to the 'new minority.'

There is a white minority evolving inside America within the next 34 years. What kind of treatment can you and yours expect from the new Afro-Chicano Spanish-speaking majority?

On August 13th 2008 The New York Times quoted a US Census Bureau statement which said in part: "White people of European descent will no longer make up a majority of the US population by the year 2042 - eight years sooner than previous estimates. ...The new projections suggest that by 2050 (non-white) minorities will account for 54% of the population and non-Hispanic whites 46%. ... *Immigration and higher birth rates among US minorities, especially Hispanics, are accelerating the demographic changes.*"
